

STITCH LINE

14' EVENT SHADE MODEL 9391-144

Before you begin

Read all instructions before set up.

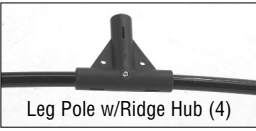

- Select a level site clear of rocks, branches, and other hard or sharp objects to install your shelter.

⚠ WARNING: Keep clear of overhead power lines.

- It is important to the stability and life of your shelter to have a secure mounting surface.
- Consult a local contractor for any local building code requirements.
- Enlist the help of at least one other person to assist you when it is time to assemble the shelter.

Parts and Components

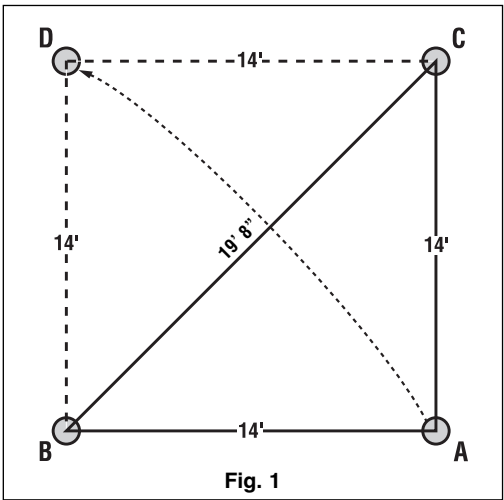

Description	Part Number
Peak Pole w/Center Hub (1)	9391-1401
Peak Connector Poles (2)	9391-1411
Leg Pole w/Ridge Hub (4)	9391-1421
Pad Feet (4)	9391-1451
Canopy (1)	9391-1461

Corner Locator

Important: All four Pad Feet of the Event Shade must be located 14 feet apart. For accurate placement, use the rings on the corner locator to mark locations (Fig. 1):

- Place white ring on corner locator at point "A" and mark with a stake.
- Extend rings "B" & "C" out to form a 90° angle and mark both points with a stake. Distance between point "B" & "C" will measure 19' 8".
- To locate corner "D", unhook white ring from corner "A" and move diagonally as shown and mark.
- Remove and stow corner locator for future use.

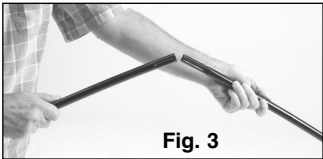

To Set Up Shelter

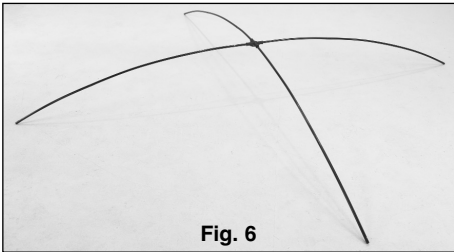

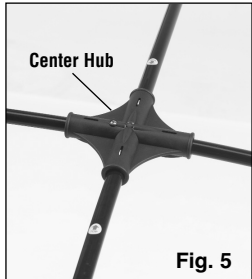

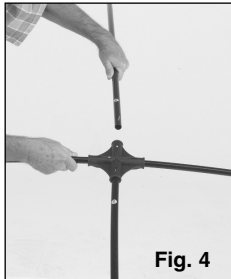

1. Assemble Peak Pole with Center Hub. (Fig. 2)

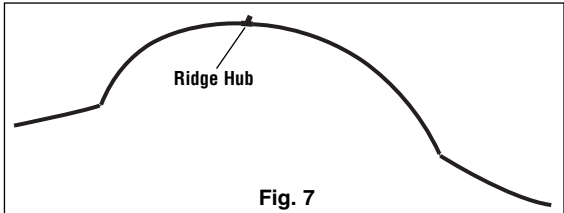

2. Assemble both Peak Connector Poles. (Fig. 3)

3. Insert ends of the Peak Connector Poles marked with the arrows into the Peak Pole with Center Hub. (Fig. 4, 5 & 6)

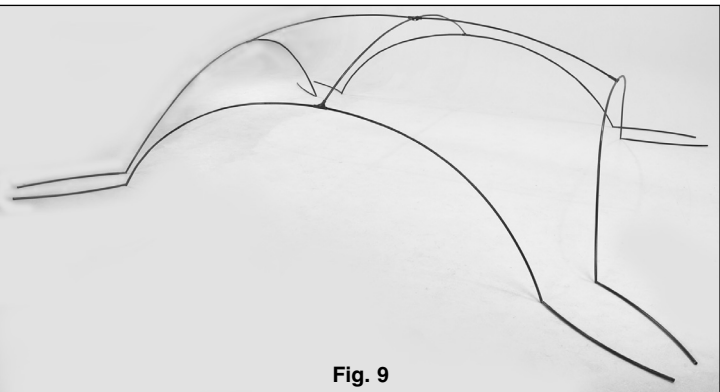

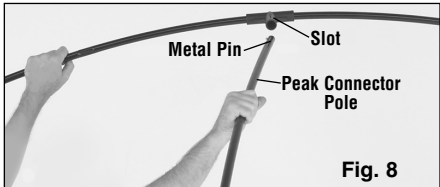

4. Partially assemble the four Leg Poles with Ridge Hub. (Fig. 7)
NOTE: Do not assemble the last pole on each side of the Ridge Hubs at this time.

5. Insert end of Peak Connector Pole into Ridge Hub (Fig. 8 & 9). Repeat for the remaining three Leg Pole with Ridge Hubs.

NOTE: Make sure metal pin locks into slot on top of Ridge Hub, you may have to twist Peak Connector from side to side.

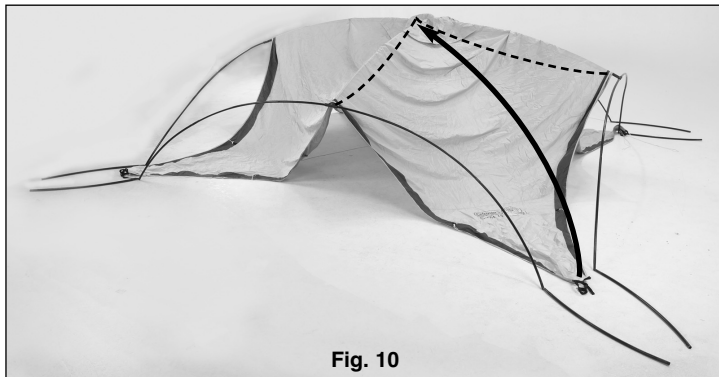

(continued on other side)

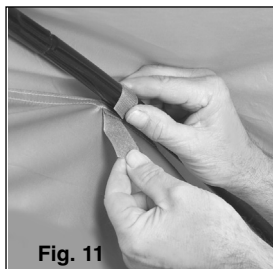

STITCH LINE

To Set Up Shelter (continued)

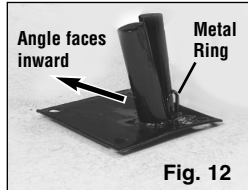

6. Unfold Canopy and pull over frame. Fold back one flap on canopy to allow easy access to inside of shelter frame and under-side of canopy. (Fig. 10)

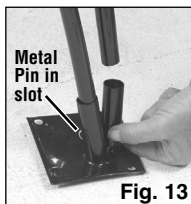

7. Locate the hook & loop fasteners closest to the center of the under side of the canopy and wrap around poles to secure. (Fig. 11)

8. Position Pad Feet at the four corners (determined with the use of the Corner Locator in Step 1) as shown. (Fig. 12)
NOTE: Pad Feet must angle in toward center of shelter with metal ring facing outward.

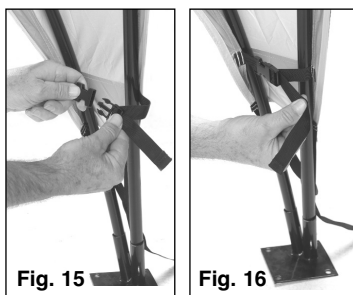

9. Insert ends of Poles into Pad Feet and twist until metal pin locks into slot (Fig. 13).
10. Repeat for other three Pad feet locations.
NOTE: Make sure the metal rings on the Pad Feet are facing out.

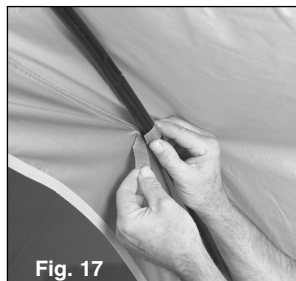

11. Drive stakes through holes in Pad Feet to secure. (Fig. 14)
NOTE: Coleman provides 2 stakes per Pad Foot. Soil type may dictate the use of more stakes. Extra stakes may be purchased at any local sporting goods dealer.

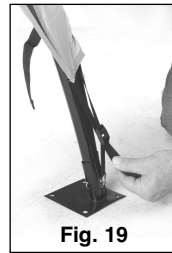

12. Wrap web straps around Pole at all four corners and hook snap-in buckles. Pull strap, at each corner, to tighten. (Fig. 15 & 16)

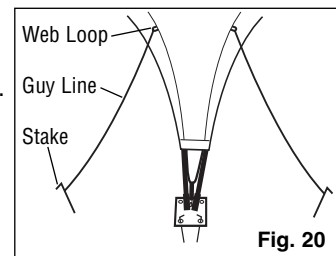

13. Locate all velcro straps on the seams on the inside of the Canopy. Undo straps, wrap around Poles and secure tightly. (Fig. 17)

14. Attach hook end of Canopy tension strap to the metal ring on the Pad Feet. Repeat for the remaining three Pad Feet. Pull down strap, at each corner, to tighten. (Fig. 18 & 19)

15. Attach Guy Lines to web loops located on outside seams of Canopy then secure with stakes. (Fig. 20)

Optional Sunwalls may be placed in any of the arched openings of the Shelter. See your local retailer or visit www.coleman.com to order.

**Things You Should Know:**

- Never store your shelter, even for a short period of time, without drying it thoroughly and brushing off caked dirt. Do not pack stakes or poles inside your shelter. Use a separate storage bag.
- Stakes should be removed by pulling on the stake itself. Never pull on the canopy to remove stake.
- SHELTER POLES SHOULD NOT BE LEFT TELESKOPED TOGETHER DURING STORAGE.

⚠ WARNING: Keep all flame and heat sources away from this shelter fabric.

This shelter meets the flammability requirements of CPAI-84. The fabric will burn if left in continuous contact with any flame source. The application of any foreign substance to the shelter fabric may render the flame-resistant properties ineffective.
